Solder plus Support

Bar Solder

HIGH QUALITY BAR SOLDER PRODUCED BY AIM

SAC305

➤ **The Industry Standard**

High purity, low dross, suited for all soldering applications

REL61™

➤ **SMT & Wave : One Alloy That Does It All**

Low-silver, low-cost alternative for SAC305 with drop-in performance

SN100C®

➤ **The Original Silver-Free SAC305**

Replacement; *Accept No Substitute*

Backed by 20 years of industry experience

SN63/PB37

➤ **AIM's Electropure™ Sn/Pb Bar Solder**

High purity, reduces drossing and exceeds IPC J-STD-006 specifications

Solder plus Support

AIM Solder provides high quality alloys and chemistries to the electronics industry. AIM's variety of solder alloys provide solutions for issues common to the PCB assembly industry. AIM alloy products are produced using their proprietary Electropure™ process resulting in a low drossing and low oxide alloy.

AIM's solder alloys are available in a variety of products including paste, wire, and bar.

➤ **AIM Bar Solder Engineered for Compatibility.**
