

H10

No Clean Solder Paste

HIGH PERFORMANCE SOLDER PASTE

KEY FEATURES

- ▶ Halogen-free
- ▶ Consistent transfer efficiency of >90% on aperture area ratios of 0.5
- ▶ Low BTC, BGA and LGA voiding
- ▶ Excellent wetting performance
- ▶ Eliminates NWO (non-wet opens)
- ▶ Improves electrochemical reliability on all low stand-off devices
- ▶ Extended stencil life, wide process window

AVAILABILITY

H10 is available in multiple lead-free alloys.

H10 Zero Halogen No Clean Solder Paste is engineered for the most demanding applications including automotive, LED lighting and EMS assemblies. Rapid advances in technology and environmental considerations require innovative solutions. AIM H10 has been engineered to provide robust, stable performance in a Pb-Free, Zero Halogen, No Clean solder paste, meeting or exceeding current RoHS, REACH and IPC requirements.

➤ **H10 Powerful, Reliable, Responsible.**
